BRAND BOOK 2018

TURTLECOIN BRAND GUIDELINES

WHY GUIDELINES?

The following design guidelines have been designed to help the community create a professional, powerful, easy and consistent brand identity that clearly communicates the TurtleCoin's community spirit.

They are intended to be as unrestrictive as possible so that every member of the community can express their ideas freely,

ng elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

Vel risus commodo viverra maecenas accumsan lacus vel facilisis volutpat.

- RockSteady

CONTENTS

00. The wordmark	4	05. Safe Zone	11
01. The symbol	6	06. Do's and Don'ts	12
02. The <i>shell</i>	7	07. Typography	13
03. Color breakdown	8	08. Tone of voice	14
04. Colorways	10	09. File cheat sheet	15

THE WORDMARK

The TurtleCoin wordmark is representative of the TurtleCoin network and is favored when the focus of the document is the network as a whole, not only the Token.

90° rotations of the wordmark are allowed
e.g. vertical wallpapers, watermarks, posters,
etc.

STACKED VERSION

The vertical stacked variant of the logo was created for those cases in which the standard version is not suitable, such as stickers, posters, profile pictures, etc.

TURTLECOIN

THE SYMBOL

The TurtleCoin wordmark was created to represent privacy, union, simplicity and all the core values that it's community represents.

It can be separated from the Wordmark as long as the TurtleCoin Network's name is being prominently promoted in the document or page.

THE SHELL

The shell icon was created to represent the TurtleCoin token and is favored in place of the symbol in places which the prominence of the Network is not necessary or has already been established elsewhere in the document/page.

PRIMARY PALETTE

These are the colors of our core Identity.

Their usage is preferred over the secondary palette in cases which need a stronger brand presence and/or go more in hand with the core of TurtleCoin's Values

#0843D

#00632E

#339D64

#66B58B

#FFFFFF

#D7DBD4

SECONDARY PALETTE

We have chosen to add a secondary palette so everyone has a chance to freely create and design their own assets and designs.

If you're not sure about a certain design, ask our community to see what

AVAILABLE COLORWAYS

These are the preferred ways in which the logo should be presented to a bigger audience, like marketing materials, official social media accounts, and core projects.

We don't have a say over memes though.

Green on white/light background

Dark on white/light background.

Light on dark/color background.

SAFE ZONE

The safe zone for almost every version is represented by the height of the hexagon. The only exception being the vertical variant, in which the width of the O is used.

Necessary clear space is built into the core files.

RESTRICTED USE

✓ Follow this book

✗ Rotate or rearrange the elements

✗ Stretch or distort the logo

✗ Change the elements colors

TYPOGRAPHY

Roboto

The Roboto font family is the one present in the Wordmark and the main font to be used when wanting to clearly and objectively communicate information.

aA

123456789

Montserrat

We use the Montserrat font family for storytelling, expressing opinions and calls to action.

HOW WE TALK

Uplifting

We want to have the perfect first impression for people tired of empty promises and projects with no real value. We want them to feel like they can make a difference in TurtleCoin

Fun

We are a brand that relies on people -both the people who spend hours on awesome projects for the network and those who embody the TurtleCoin spirit of community and union.

Inviting

We are open and accessible to anyone and everyone who wants to assist and help the TurtleCoin mission spread across the globe. Even if you don't, we will make you feel at home.

Format File
Format

turtlecoin_wordmark_s_c_rgb@2x.png

Version Color Size

The diagram shows the filename 'turtlecoin_wordmark_s_c_rgb@2x.png' in a large, bold, green font. Above the filename, three labels are connected to the filename by vertical dotted lines: 'Variant' points to the 's' (which is not explicitly labeled as a variant in the diagram), 'Color Format' points to 'c', and 'File Format' points to 'png'. Below the filename, three labels are connected to the filename by vertical dotted lines: 'Version' points to 's', 'Color' points to 'c', and 'Size' points to '@2x'.
